### REASONS FOR ALLOWANCE

**The following is an Examiner's Statement of Reasons for Allowance:**

The prior arts of record teach a visual execution monitoring tool for monitoring execution of a message processing program, comprising: one or more components for generating program execution progress reports upon reaching predefined states of program execution, the execution progress reports including a representation of the current contents of a message being processed by the message processing program, and for sending the execution progress reports to an execution monitoring controller. Aizenbud-Reshef et al., U.S. Publication number: 2002/0120819 is one such example of prior art. The prior arts of record, however, fails to teach, singly or in combination, accessing breakpoint information specifying one or more breakpoints, and determining based upon a context information and the breakpoint information whether a breakpoint has been reached, and responsive to this determination, precluding a processor from continuing with the computer program. In Examiner's opinion, the subject matter sought to be patented as recited in the claims in this application has practical applications in the field of a mechanism for debugging a computer process.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
